SUMMARY

Computer Science and Engineering (AI & ML) student with hands-on internship experience in Python Machine Learning and Full Stack Development. Passionate about building intelligent applications and AI-based solutions for real-world challenges, with a strong foundation in Data Structures and Algorithms and modern web technologies.

EDUCATION

Chennai Institute of Technology <i>B.E. Computer Science and Engineering (AI & ML) — CGPA: 7.7</i>	Chennai, India 2023 – 2027
--	-------------------------------

EXPERIENCE

Plant Green Inertia Private Limited <i>Full Stack Development Intern</i>	Chennai, India May 2025 – Jun 2025
--	---------------------------------------

- Gained hands-on experience in full stack development at a sustainability-focused technology startup.
- Worked with frontend and backend technologies including React, Node.js, and Express.js.
- Maintained professionalism while adhering to company policies and confidentiality standards.

Mirror Technologies Pvt Ltd <i>Python Machine Learning Intern</i>	Chennai, India Nov 2024 – Dec 2024
---	---------------------------------------

- Applied Python and machine learning concepts to real-world project development.
- Gained industry exposure in AI and Machine Learning aligned with academic specialization.
- Worked on intelligent automation and data-driven problem-solving approaches.

PROJECTS

- **SmartFlow: AI-Powered Adaptive Traffic Management** AI, Real-Time Monitoring
 - Developed an AI-based traffic management system with real-time vehicle monitoring.
 - Implemented adaptive traffic signal control to improve traffic flow efficiency.
 - Enhanced traffic flow optimization using intelligent decision-making algorithms.
- **Gestura: Intelligent Control with Voice and Gestures** Computer Vision, Voice Recognition
 - Built an intelligent automation system enabling device control through hand gestures and voice commands.
 - Integrated computer vision and speech recognition for seamless human-computer interaction.
 - Enhanced user interaction through real-time gesture and voice recognition modules.

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript, HTML5, CSS3

Development: React, Node.js, Express.js

Databases: MySQL, MongoDB

Tools: Git, GitHub, Tableau, VS Code

CERTIFICATIONS

Ethical Hacking (NPTEL) • Cybersecurity Essentials (Cisco Networking Academy) • Data Structures / Algorithms on Strings (UC San Diego) • Data Science with Python (IBM)
